Authors Index Volume 2

ARNTZEN, C. J. *Inhibition of Electron-Transport in Chloroplasts by a Quinone Analogue: Evidence for Two Sites of $DPIPH_2$ Oxidation* 73
BANGHAM, J. A. *The Effects of Colloids on the Appearance and Substrate Permeability of Rat Liver Mitochondria* 221
BARBARESI, GIULIANO. *Effect of Phospholipids from* Saccharomyces cerevisiae *at Different Stages of Development on Restoration of Succinoxidase Activity in Lipid-Depleted Mitochondria* 135
BARSKY, E. L. *Determination of the Quantum Yields of the Primary Photosynthesis Events and the Photosynthetic Unit Types in Purple Bacteria* 275
BERTOLI, ENRICO. *Effect of Phospholipids from* Saccharomyces cerevisiae *at Different Stages of Development on Restoration of Succinoxidase Activity in Lipid-Depleted Mitochondria* 135
BÖHME, H. *High and Low Potential States of the Chloroplast Cytochrome b-559 and Thermodynamic Control of Non-cyclic Electron Transport* 289
BORISOV, A. YU. *Determination of the Quantum Yields of the Primary Photosynthesis Events and the Photosynthetic Unit Types in Purple Bacteria* 275
BOWES, GERALD W. *Inhibition of Photosynthetic Electron Transport by DDT and DDE* 47
BROWN, OLEN R. *Resistance of Oxidative Phosphorylation in* Escherichia coli *to Hyperoxia* 217
CABO-SOLER, J. *Inadequacy of Myelin Phospholipids for Restoration of Succinoxidase Activity in Lipid-depleted Mitochondria* 129
CASTELLI, ADRIANO. *Effect of Phospholipids from* Saccharomyces cerevisiae *at Different Stages of Development on Restoration of Succinoxidase Activity in Lipid-Depleted Mitochondria* 135
CHEAH, K. S. *Post-Mortem Changes in Structure and Function of Ox Muscle Mitochondria. I. Electron Microscopic and Polarographic Investigations* 85
COCKING, E. C. *A Mechanism for the Pinocytosis of Latex Spheres by Tomato Fruit Protoplasts* 371
CRAMER, W. A. *High and Low Potential States of the Chloroplast Cytochrome b-559 and Thermodynamic Control of Non-cyclic Electron Transport* 289
CRANE, F. L. *A Durohydroquinone Oxidation Site in the Mitochondrial Transport Chain* 317
DILLEY, RICHARD A. *Light-Dependent Chloroplast Volume Changes in Chloride Media* 33
DILLEY, RICHARD A. *Inhibition of Electron-Transport in Chloroplasts by a Quinone Analogue: Evidence for Two Sites of $DPIPH_2$ Oxidation* 73
DEAMER, DAVID. *Light-Dependent Chloroplast Volume Changes in Chloride Media* 33
ELEY, D. D. *Microwave Hall Mobility Measurements on Rat Liver Mitochondria and Spinach Chloroplasts* . 39
FAN, H. N. *High and Low Potential States of the Chloroplast Cytochrome b-559 and Thermodynamic Control of Non-cyclic Electron Transport* 289
FLEISCHER, SIDNEY. *Kinetic Studies of the Lipid Requirement of Mitochondrial Cytochrome c Oxidase* . . 209
GEE, ROBERT W. *Inhibition of Photosynthetic Electron Transport by DDT and DDE* 47
GRANGER, M. *The Use of a Continuous Assay System to Show the Stimulation of Phosphoenolpyruvate Production in Intact Mitochondria by Valinomycin and by Mn^{2+}* 151
GREEN, DAVID E. *The Inhibition of Mitochondrial Energized Processes by Fluorescein Mercuric Acetate* . . 13
GREEN, DAVID E. *A Lattice Structure in Beef Heart Mitochondria Induced by Phosphotungstic Acid* 167
GREEN, DAVID E. *On the Correlation of Configurational Changes in the Inner Mitochondrial Membrane with Energization* 183
GREEN, DAVID E. *On the Structure of Biological Membranes: The Double Tiered Pattern* 233
GREVILLE, G. D. *Effect of High Sucrose Concentrations on Mitochondria: Analysis of Mitochondrial Populations by Density-Gradient Centrifugation after Fixation with Glutaraldehyde* 305
GRINIUS, L. L. *Arrangement of the Electric Potential-Generating Redox Chain in the Mitochondrial Membrane* . 101
GROUT, B. W. W. *A Mechanism for the Pinocytosis of Latex Spheres by Tomato Fruit Protoplasts* 371
GUDS, T. I. *Arrangement of the Electric Potential-Generating Redox Chain in the Mitochondrial Membrane* . 101
HANSEN, H. J. M. *Glycolytic Enzymes as a Multi-Enzyme System* 115
HARE, J. F. *A Durohydroquinone Oxidation Site in the Mitochondrial Transport Chain* 317
HARRIS, E. J. *Mitochondrial ATP Contents During Phosphorylation* 93
HARRIS, E. J. *The Use of a Continuous Assay System to Show the Stimulation of Phosphoenolpyruvate Production in Intact Mitochondria by Valinomycin and by Mn^{2+}* 151
HARRIS, E. J. *The Effects of Colloids on the Appearance and Substrate Permeability of Rat Liver Mitochondria* . 221
HARRIS, ROBERT A. *The Inhibition of Mitochondrial Energized Processes by Fluorescein Mercuric Acetate* . 13
HART, C. J. *Fluorescence Studies of Possible Protein–Protein Interactions in Model Lipoprotein Complexes* . . 283
HASLAM, J. M. *Biogenesis of Mitochondria 19: The Effects of Unsaturated Fatty Acid Depletion on the Lipid Composition and Energy Metabolism of a Fatty Acid Desaturase Mutant of* Saccharomyces cerevisiae . 327
HASLAM, J. M. *Biogenesis of Mitochondria 20: The Effects of Altered Membrane Lipid Composition on Mitochondrial Oxidative Phosphorylation in* Saccharomyces cerevisiae 351
HATASE, OSAMU. *A Lattice Structure in Beef Heart Mitochondria Induced by Phosphotungstic Acid* 167

HATASE, OSAMU. *On the Correlation of Configurational Changes in the Inner Mitochondrial Membrane with Energization* . . . 183
HÜBSCHER, G. *Glycolytic Enzymes as a Multi-Enzyme System* . . . 115
HUUNAN-SEPPÄLÄ, ANTTI. *Cation Permeability Induced by Spermine and Polybrene in Rat Liver Mitochondria* . 197
KORMAN, E. F. *On the Structure of Biological Membranes: The Double-Tiered Pattern* . . . 233
LEE, MARTIN, J. *The Inhibition of Mitochondrial Energized Processes by Fluorescein Mercuric Acetate* . . 13
LENAZ, GIORGIO. *Effect of Alcohols on the Functional Organization of the Inner Mitochondrial Membrane* . . 119
LENAZ, GIORGIO. *Inadequacy of Myelin Phospholipids for Restoration of Succinoxidase Activity in Lipid-depleted Mitochondria* . . . 129
LENAZ, GIORGIO. *Effect of Phospholipids from* Saccharomyces cerevisiae *at Different Stages of Development on Restoration of Succinoxidase Activity in Lipid-Depleted Mitochondria* . . . 135
LESLIE, R. B. *Fluorescence Studies of Possible Protein–Protein Interactions in Model Lipoprotein Complexes* . 283
LINNANE, ANTHONY W. *Biogenesis of Mitochondria 19: The Effects of Unsaturated Fatty Acid Depletion on the Lipid Composition and Energy Metabolism of a Fatty Acid Desaturase Mutant of* Saccharomyces cerevisiae 327
LINNANE, ANTHONY W. *Biogenesis of Mitochondria 20: The Effects of Altered Membrane Lipid Composition on Mitochondrial Oxidative Phosphorylation in* Saccharomyces cerevisiae. . . . 351
MANGER, J. R. *The Effects of Colloids on the Appearance and Substrate Permeability of Rat Liver Mitochondria* 221
MAYER, R. J. *Glycolitic Enzymes as a Multi-Enzyme System* . . . 115
MITCHELL, PETER. *Activation and Inhibition of Mitochondrial Adenosine Triphosphatase by Various Anions and other Agents* . . . I
MONSIGNI, N. *Effect of Alcohols on the Functional Organization of the Inner Mitochondrial Membrane* . . 119
MOYLE, JENNIFER. *Activation and Inhibition of Mitochondrial Adenosine Triphosphatase by Various Anions and other Agents* . . . I
MUNN, E. A. *Effect of High Sucrose Concentrations on Mitochondria: Analysis of Mitochondrial Populations by Density-Gradient Centrifugation after Fixation with Glutaraldehyde* . . . 305
NEUMANN, J. *Inhibition of Electron-Transport in Chloroplasts by a Quinone Analogue: Evidence for Two Sites of $DPIPH_2$ Oxidation* . . . 73
PACKER, L. *Effect of High Sucrose Concentrations on Mitochondria: Analysis of Mitochondrial Populations by Density-Gradient Centrifugation after Fixation with Glutaraldehyde* . . . 305
PANT, HARISH C. *The Semiconducting Diode Behavior of Bimolecular Lipid Membranes* . . . 163
PARENTI-CASTELLI, G. *Effect of Alcohols on the Functional Organization of the Inner Mitochondrial Membrane* 119
PARENTI-CASTELLI, G. *Inadequacy of Myelin Phospholipids for Restoration of Succinoxidase Activity in Lipid-depleted Mitochondria* . . . 129
PETHIG, R. *Microwave Hall Mobility Measurements on Rat Liver Mitochondria and Spinach Chloroplasts* . . 39
POLLAK, J. K. *Effect of High Sucrose Concentrations on Mitochondria: Analysis of Mitochondrial Populations by Density-Gradient Centrifugation after Fixation with Glutaraldehyde* . . . 305
PROUDLOCK, J. W. *Biogenesis of Mitochondria 19: The Effects of Unsaturated Fatty Acid Depletion on the Lipid Composition and Energy Metabolism of a Fatty Acid Desaturase Mutant of* Saccharomyces cerevisiae . 327
PROUDLOCK, J. W. *Biogenesis of Mitochondria 20: The Effects of Altered Membrane Lipid Composition on Mitochondrial Oxidative Phosphorylation in* Saccharomyces cerevisiae . . . 351
ROSENBURG, BARNETT. *The Semiconducting Diode Behavior of Bimolecular Lipid Membranes* . . . 163
SECHI, A. MARIA. *Inadequacy of Myelin Phospholipids for Restoration of Succinoxidase Activity in Lipid-depleted Mitochondria* . . . 129
SENIOR, A. E. *On the Relationship Between the Oligomycin-Sensitivity Conferring Protein and other Mitochondrial Coupling Factors* . . . 141
SILVESTRINI, M. GRAZIA. *Effect of Alcohols on the Functional Organization of the Inner Mitochondrial Membrane* 119
SKULACHEV, V. P. *Arrangement of the Electric Potential-Generating Redox Chain in the Mitochondrial Membrane* 101
SMOLY, JENNIE M. *A Lattice Structure in Beef Heart Mitochondria Induced by Phototungstic Acid* . . . 167
TATE, CAROL. *The Effects of Colloids on the Appearance and Substrate Permeability of Rat Liver Mitochondria* . 221
TOLLIN, GORDON. *Flash Photolysis of Flavins. V. Oxidation and Disproportionation of Flavin Radicals* . . 61
TRIBUTSCH, HELMUT. *Application of Electrochemical Kinetics to Photosynthesis and Oxidative Phosphorylation: The Redox Element Hypothesis and the Principle of Parametric Energy Coupling* . . . 249
VAISH, SHIV P. *Flash Photolysis of Flavins. V. Oxidation and Disproportionation of Flavin Radicals* . . 61
WAKABAYASHI, TAKASHI. *The Inhibition of Mitochondrial Energized Processes by Fluorescein Mercuric Acetate* . 13
WAKABAYASHI, TAKASHI. *A Lattice Structure in Beef Heart Mitochondria Induced by Phosphotungstic Acid* . 167
WAKABAYASHI, TAKASHI. *On the Correlation of Configurational Changes in the Inner Mitochondrial Membrane with Energization* . . . 183
WAKABAYASHI, TAKASHI. *On the Structure of Biological Membranes: The Double-Tiered Pattern* . . . 233
WILLISON, J. H. M. *A Mechanism for the Pinocytosis of Latex Spheres by Tomato Fruit Protoplasts* . . 371
ZAHLER, W. L. *Kinetic Studies of the Lipid Requirement of Mitochondrial Cytochrome c Oxidase* . . . 209
